

UNITED STATES DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY

Maps showing porosity variations and geothermal gradients of
the upper part of the Tensleep Sandstone and equivalents, Bighorn,
Wind River, and Greater Green River Basins, Wyoming

By

J. E. Fox, P. W. Lambert, R. F. Mast, N. W. Nuss, and R. D. Rein

Open-file report 75-280

1975

This report is preliminary and has not
been edited or reviewed for conformity
with U.S. Geological Survey standards
and nomenclature.

INTRODUCTION

This report consists of twelve Tensleep porosity distribution maps, four for each of the three basins studied in Wyoming (Bighorn, Wind River, and Greater Green River Basins). One geothermal gradient map of all three basins is also included. In addition, there are three tables, one for each basin, containing well name, location, porosity data, and temperature gradient data for each well shown on the maps.

The reader is referred to the Geologic Map of Wyoming to determine the United States Land Survey location of each well shown on the maps and listed on the tables.

The figures included in this report are as follows:

- Figure 1. Pennsylvanian Tensleep Sandstone, Bighorn Basin, map of average percent porosity.
- Figure 2. Pennsylvanian Tensleep Sandstone, Bighorn Basin, sixth order trend surface map of average percent porosity.
- Figure 3. Pennsylvanian Tensleep Sandstone, Bighorn Basin, sixth order residual map of average percent porosity.
- Figure 4. Pennsylvanian Tensleep Sandstone, Bighorn Basin, map of total thickness of strata in the upper part of the Tensleep with porosity greater than 8 percent.
- Figure 5. Pennsylvanian Tensleep Sandstone, Wind River Basin, map of average percent porosity.
- Figure 6. Pennsylvanian Tensleep Sandstone, Wind River Basin, sixth order trend surface map of average percent porosity.
- Figure 7. Pennsylvanian Tensleep Sandstone, Wind River Basin, sixth order residual map of average percent porosity.

- Figure 8. Pennsylvanian Tensleep Sandstone, Wind River Basin, map of total thickness of strata in the upper part of the Tensleep with porosity greater than 8 percent.
- Figure 9. Pennsylvanian Tensleep Sandstone, Greater Green River Basin, map of average percent porosity.
- Figure 10. Pennsylvanian Tensleep Sandstone, Greater Green River Basin, sixth order trend surface map of average percent porosity.
- Figure 11. Pennsylvanian Tensleep Sandstone, Greater Green River Basin, sixth order residual map of average percent porosity.
- Figure 12. Pennsylvanian Tensleep Sandstone, Greater Green River Basin, map of total thickness of strata in the upper part of the Tensleep with porosity greater than 6 percent.
- Figure 13. Geothermal gradient map and locations of oil and gas fields with production from the Tensleep Sandstone in the Bighorn, Wind River, and Greater Green River Basins, Wyoming.

The tables included in this report are as follows:

Table 1-A. Data from Bighorn Basin.

Table 1-B. Data from Wind River Basin.

Table 1-C. Data from Greater Green River Basin.

Table 2-A.--Data from Big Horn Basin
